

January 25, 2007

**FOR IMMEDIATE RELEASE (January 25, 2007) re:think Entertainment's feature length HD version of *A Year On Earth* has been picked up by Canadian specialty broadcaster Equator HD, one of the High Fidelity HDTV suite of HD channels.**

**Produced by Bahati Productions (USA) in association with the Earthwatch Institute, *A Year On Earth* follows three idealistic teenagers on a groundbreaking journey of global exploration and self-discovery. The documentary is a stunning adventure in science, featuring the world's wildest places and most endangered creatures. From global warming to deforestation, it makes these problems real for a new generation.**

**John Panikkar, CEO and Head of Programming for the network commented, "A Year on Earth tells a vital and engaging story which is sure to appeal to all audiences, and we are pleased to be able to offer it to viewers of Equator HD".**

**High Fidelity HDTV is Canada's leading HD broadcaster. Equator HD is one of four all-HD channels available across Canada on a growing number of television service providers. In addition to Equator HD, High Fidelity HDTV offers Oasis HD, Treasure HD and Rush HD.**

**"We are focused on delivering smart, refreshing and beautiful programming to the rapidly growing number of Canadians who want to watch High Definition television," adds Panikkar, "and A Year on Earth fits that mandate perfectly."**

***A Year on Earth* will be telecast on February 19th at 9:00pm ET and PT, only on Equator HD.**
